The Mystery of the Lost Ark of the Covenant

The Lost Ark of the Covenant, the most holy and powerful object on Earth.

What happened to it? Where is it located today?

A diversity of Archeologists and Biblical Scholars has been searching for [the Ark of the Covenant](#) for decades, but no trace has been found. Its last known location was at the Temple of Solomon in Jerusalem around 586 B.C. when it mysteriously disappeared.

Whether it was destroyed, captured or hidden, nobody alive today seems to know. One of the most famous claims about the Ark's whereabouts is that before the Babylonians invaded and sacked Jerusalem, it had found its way to Ethiopia, where it still resides in the town of Aksum, in the St. Mary of Zion cathedral. However, no one has been able to substantiate that claim as being factual.

If it is there, it certainly is not visible, and could possibly be hidden in a secret lower chamber. If it could be found, however, it would be the most significant theological biblical discovery in history.
